DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1, 3-5 and 19, drawn to a powder composition for paper manufacturing and a method of producing a pulp sheet using the powder composition.

Group II, claim(s) 6-10, drawn to a bulking agent for paper; a method of producing a bulk sheet using the agent.

Group III, claim(s) 11-18, drawn to a paper manufacturing chemical agent particle and a method of producing the particle.

The inventions listed as Groups I, II and III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:.

The inventions listed as Groups I and II, Groups I and III and Groups II and III share the common technical feature of a paper manufacturing additive that is a bulking agent. Groups I and II also share the common technical feature of adding the additive to a pulp slurry.

The common technical features described above are disclosed by Tadokoro et al (6599392) in the Examples in cols 4-6. The cited examples disclose making a paper by a method comprising adding a bulking promoter to a papermaking slurry.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

If the invention of Group I is elected, this application also contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

- A. organopolysiloxane compounds
- B. amine compounds
- C. amineacid salt compounds
- D. quaternary ammonium compounds
- E. imidazole compounds
- F. hydrocarbon compounds
- G. alcohol compounds
- H. aliphatic acids or esters of aliphatic acids and aliphatic alcohols

- I. addition products of alkylene oxide having 2 to 4 carbon atoms with aliphatic acids or with esters of aliphatic acids and aliphatic alcohols
- J. aliphatic acid amides or aliphatic acid amideamines
- K. addition products of alkylene oxide having 2 to 4 carbon atoms with aliphatic acid amides or aliphatic acid amideamines.

Claims 1, 3-5 and 19 are deemed to correspond to the species listed above.

No claims are generic.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: each of the identified species has a significantly different combination of functionality from the others and each belongs to a different class of chemical compounds.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Applicant is advised that the reply to this requirement to be complete must include (i) an election of an invention and species to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
